CHEMICAL PHYSICS

Volume 137, number 1,2,3, 15 October 1989

CONTENTS

Qualitative analysis of vibrational polyads: *N*-mode case
B.I. Zhilinskii 1

Structural consequences of the jellium model for alkali metal clusters
D.M.P. Mingos and Z. Lin 15

Competition between exchange and dissociation processes in $He+H_2^+$ collisions
S. Kumar and N. Sathyamurthy 25

Quasiclassical trajectory calculation of the $B^+ + H_2 \rightarrow BH^+ + H$ reaction
V. Klimo, J. Tiňo and J. Urban 33

Kinetics of diffusion-controlled reactions
A.M. Berezhkovskii, Yu.A. Makhnovskii and R.A. Suris 41

Spin polarization and magnetic field effects in radical pairs. Short-time perturbational treatment taking into account isotropic and anisotropic magnetic interactions
K. Lüders and K.M. Salikhov 51

Non-adiabaticity in terms of dynamic potentials. An analysis of linear $E\otimes\epsilon$ vibronic states
L. Yin and O. Goscinski 67

Theory of excitation energy transfer in the primary processes of photosynthesis. I. General results
L. Skala and V. Kapsa 77

Theory of excitation energy transfer in the primary processes of photosynthesis. II. Group symmetry analysis of the bacterial light-harvesting complex
L. Skala and P. Jungwirth 93

Mean first passage time approach to reactivity of complex systems by dimension reduction
I. Schek 99

Photoisomerization of stilbene – a theoretical study of deuteration shifts and limited internal vibrational redistribution
S. Nordholm 109

Local and non-local dispersion models
A.J. Stone and C.-S. Tong 121

MRD CI calculations on the radiative lifetime of the $A\,^2\Delta$ state of CH
G. Theodorakopoulos, I.D. Petsalakis, R.J. Buenker and M. Honigmann 137

Ab initio calculations of electric field gradient for the B...H–Cl dimers: B=CO, HCN, H_2O, H_2S, C_2H_2, C_2H_4, NH_3, PH_3 and CH_3CN
W.B. De Almeida and A. Hinchliffe 143

Ab initio calculations on the group IV tetrafluoride radical cations
R.A. Beärda, H.R.R. Wiersinga, J.F.M. Aarts and J.J.C. Mulder 157

The matrix singularity problem in the time-dependent variational method
K.G. Kay 165

(continued on page 3 of cover)

CONTENTS

(continued from page 4 of cover)

Angular distribution and rotational excitation in proton–O_2 collisions: a separate adiabatic model for the dynamics
F.A. Gianturco, A. Palma and F. Schneider 177

Effect of quantization of rotational energy on the ion–molecule capture
J. Turulski and J. Niedzielski 191

The influence of singlet–triplet transitions on non-stationary kinetics of radical recombination in homogeneous solutions. I. General theory and analytical model treatment
N.V. Shokhirev, E.B. Krissinel' and K.M. Salikhov 197

The influence of singlet–triplet transitions on non-stationary kinetics of radical recombination in homogeneous solutions. II. Numerical case studies
E.B. Krissinel', N.V. Shokhirev and K.M. Salikhov 207

A contribution to non-equilibrium chemical kinetics. III. Some high-energy strongly non-equilibrium processes in solids and liquids
A.Ya. Temkin 221

Muon level crossing resonance study of radical formation in allylbenzene, styrene and toluene
K. Venkateswaran, M.V. Barnabas, Z. Wu, J.M. Stadlbauer, B.W. Ng and D.C. Walker 239

Rotational structure of $\Delta v_{Si-H}=7$ and 8 overtone transitions of $SiHD_3$
A. Campargue, M. Chenevier and F. Stoeckel 249

Infrared dynamical studies of matrix isolated NH_3. I. Vibrational relaxation
P. Boissel, B. Gauthier-Roy and L. Abouaf-Marguin 257

Infrared dynamical studies of matrix isolated NH_3. II. Hole burning effect in nitrogen matrices
P. Boissel, B. Gauthier-Roy and L. Abouaf-Marguin 269

The noncoincidence effect in N,N-dimethylformamide – a comparison of theoretical predictions and experimental results
V.M. Shelley and J. Yarwood 277

Photogeneration processes in some charge-transfer complexes
B. André, R. Lever and J.Y. Moisan 281

The photoabsorption of BF_3 in the energy range 6.5–20 eV
G. Hagenow, K. Hottmann, H.W. Jochims and H. Baumgärtel 287

External magnetic field effect on the fluorescence of gaseous CS_2 excited to the V $^1B_2$ state with nanosecond and picosecond dye lasers
H. Abe, H. Hayashi, T. Imamura and S. Nagakura 297

Photodissociation dynamics of HONO($\tilde{A}$): velocity aligned Doppler spectroscopy of the OH fragment
R.N. Dixon and H. Rieley 307

Distributions over the 4s, 4p and 4d sublevels and hydrogen atom emission cross sections following e–H_2 collisions
T. Ogawa, M. Taniguchi, K. Nakashima and H. Kawazumi 323

(continued on previous page)

CONTENTS

(continued from page 3 of cover)

Energy gap dependence for intersystem crossing within charge transfer triplet exciplexes
P.P. Levin, P.F. Pluzhnikov and V.A. Kuzmin 331

Gas phase stabilities of cluster ions $H^+(CO)_2(CO)_n$, $H^+(N_2)_2(N_2)_n$, and $H^+(O_2)_2(O_2)_n$ with $n=1-14$
K. Hiraoka and T. Mori 345

Inner shell and valence shell electronic excitation of ClF_3 by high energy electron impact. An investigation of potential barrier effects
K.H. Sze and C.E. Brion 353

Excitation and ionization of the monohaloethylenes (C_2H_3X, X=F, Cl, Br, I). II. Photoionization by He(I) and He(II) photoelectron spectroscopy and valence-shell excitation by electron energy loss spectroscopy
K.H. Sze, C.E. Brion, A. Katrib and B. El-Issa 369

Excitation and ionization of freon molecules. I. Absolute oscillator strengths for the photoabsorption (12–740 eV) and the ionic photofragmentation (15–80 eV) of CF_4
W. Zhang, G. Cooper, T. Ibuki and C.E. Brion 391

The valence orbital momentum distributions and binding energy spectra of dimethyl ether by electron momentum spectroscopy: an investigation of the methyl inductive effect
S.A.C. Clark, A.O. Bawagan and C.E. Brion 407
